Re: Texas 3-Way Split Permissive Dialing

On February 27, 2002, the Public Utility Commission of Texas ("Commission") approved a 3-way geographic split as the relief method for the 915 NPA, which serves the western portion of Texas. Two new area codes will be introduced: 325 and 432.

As ordered by the Commission, area code 325 will serve Brown County, San Angelo, Brady, Abilene, Snyder, Rising Star and adjoining towns. Area code 432 will cover the towns of Midland, Odessa, Seminole, Sanderson, Fort Stockton, Fort Davis and Alpine, and southward to Big Bend National Park. Far West Texas, toward El Paso, will retain the 915 area code.

This relief plan will result in a change in the dialing plan for the affected NPA areas. In the new dialing plan, all local calls between the NPAs must be dialed using 10 digits. The Permissive Dialing Period for 10-digit dialing will begin on April 5, 2003 at 12:01AM. The Permissive Dialing Period is that period during which all local calls may be dialed with 7 or 10 digits. At the end of the Permissive Dialing Period and beginning of Mandatory Dialing on October 4, 2003, callers must dial local calls between NPAs with 10 digits.

Details regarding the introduction of the new area codes and Planning Letter can be found on the North American Numbering Plan website at <http://www.nanpa.com/>.

Below is a summary of the dialing plan once Mandatory Dialing begins:

915	915	XXX-XXXX	1+ NPA XXX-XXXX
915	432 or 325	NPA XXX-XXXX	1 + NPA XXX-XXXX
432	432	XXX-XXXX	1+ NPA XXX-XXXX
432	915 or 325	NPA XXX-XXXX	1 + NPA XXX-XXXX
325	325	XXX-XXXX	1 + NPA XXX-XXXX
325	915 or 432	NPA XXX-XXXX	1 + NPA XXX-XXXX

Texas 3-Way Split Permissive Dialing

Page 2

All domestic and international carriers are asked to ensure that the 325 and 432 NPAs have been activated throughout their networks prior to April 5, 2003. A test number for each of the new NPAs has been provided for Telecommunications Service Providers to verify routing to the new NPAs from February 8, 2002 through October 18, 2003. The test number to verify routing to the 432 NPA is 432 304-3333. The test number to verify routing to the 325 NPA is 325 303-3333. A recorded announcement will indicate that the test call has been successfully completed.

Verizon will require that carriers send the 10-digits of a called-to-party for calls terminating in all Verizon end offices and access tandems by July 6, 2003. Notification and end office and tandem details will appear in the Local Exchange Routing Guide (LERG). NXX lists are maintained and distributed by the North American Numbering Plan Administration (NANPA).

In addition, all service orders submitted to Verizon after April 5, 2003 will require the full 10 digit TN, including the correct NPA.

April 5, 2003 at 12:01 AM	Permissive Dialing Begins - End users can dial local calls between NPAs using 7- or 10-digits.
April 6, 2003	Service orders submitted to Verizon must include correct NPA.
July 6, 2003	Telecommunication Providers must transmit 10-digits to all Verizon end-offices and access tandems.
February 8, 2003 through October 18, 2003	Test Numbers available: 432 304-3333, 325 303-3333
October 4, 2003 at 12:01AM	Mandatory Dialing Begins: All calls must be dialed according to the new dialing plan.
December 19, 2003	Newly assigned NXX code activation begins in the new NPAs.

915 NXXs moving to the **432** NPA (data from NANPA Planning Letter, 4/18/02).
