### eMillennium™

The evolution of Public Access

Welcome to the next level. QuorTech Solutions has forever changed the face of public communications by bringing the power and attraction of the Internet to the already well-established Millennium<sup>™</sup> payphone family.

eMillennium<sup>™</sup> is public communication for the 21<sup>st</sup> century. It offers superior multi-pay voice access in combination with powerful, yet userfriendly web applications. Users can check email, get stock quotes, make on-line purchases, and even cruise the Internet all while talking on the phone. A built-in Ethernet data port

provides the additional option of highspeed Internet access through laptops and web-enabled portable devices.

eMillennium<sup>™</sup> is the convenient, multipurpose communication portal that public users have been waiting for.

**eMillennium**<sup>TM</sup> is as functional as it is eye catching. The 6.5" full colour screen offers amazing visual clarity, while a standardized keyboard and built in mouse make for easy and familiar navigation. Anyone who has used a personal computer will feel comfortable and confident using an eMillennium<sup>™</sup>. Whether you are a current Millennium<sup>™</sup> operator or new to the Millennium<sup>™</sup> line of phones, upgrading to eMillennium<sup>™</sup> line is simple. eMillennium<sup>™</sup> dimensions are the same as any other payphone terminal, so no new furniture is required.

> Best of all. eMillennium<sup>™</sup> is designed with customization in mind. It's built on an open platform, so advanced HTML applications can be developed quickly. Direct connections with taxis, hotels, restaurants or any other imaginable product or service can be the first thing a user sees when they approach the phone. The targeted advertising possibilities

are endless. Through **eMillennium**<sup>™</sup>, operators and site owners have an immediate and cost effective way to produce new sources of revenue.

eMillennium<sup>™</sup> provides connection without limits. It ushers in an era where the boundaries of old public access no longer exist.

The future of communications is here.

The future is **eMillennium**<sup>™</sup>

# eMillennium<sup>™</sup> Details

# Millennium<sup>™</sup> Multi-Pay Multi Application

-Recessed Coin Slot helps callers insert coins properly, and can accommodate a \$1 US or \$1 CDN coin. The validator utilizes electronic coin signatures to recognize valid coins, which provides for very good coin acceptance and excellent foreign coin/slug rejection.

-Language Selection Key provides callers with a choice of a primary or alternate language - such as English/French, or English/Japanese.

-Voice Prompts offer dialing assistance. User-friendly system enhances operational effectiveness using a high quality recorded voice.

-Adjustable Volume lets the user adjust handset volume in 6dB increments.

-Built-in Self-Diagnostics monitors terminal performance.

-Branded Upper Bezel calls attention to the service provider's name.

-Vacuum Fluorescent Display (VFD) Blue with scrolling ability. Remains visible from both high and low vantage points.

-Quick Access Keys to services and local businesses. Impacts caller satisfaction and generates revenue as well as provides opportunities to cross-sell services.

**-Next Call Key** makes it easy to place additional calls with the same card.

-Multi-Card Reader gives customers more options for payment by accepting both magnetic stripe and "smart chip" cards. Card Icons identify which cards are accepted.
